

Child Centred Recordkeeping

Explore ways in which consent of third parties to share information built into records creation

Continue advocacy for and development of tools for child centred recording practices

Define age appropriate guidelines for participation in recordkeeping

Establish benchmarks for safe, secure, child centred recordkeeping processes and systems

Transitioning and Young Adult Needs

Provide information about records and access to records as part of transitioning planning

Explore mechanisms for proactive disclosure of records and recordkeeping actions

Establish support services for access, interpretation, adding to/annotating records and specifying access controls

Establish independent safe keeping places for records

Historical Justice

Immediate priority access to records for older Care leavers

Endorse and implement the DSS access principles and guidelines

Support for adding to and annotating official records and specifying access controls

Continued advocacy and resourcing for remediation of legacy systems, e.g. name indexing and facilitation of connections to family
